

REMARKS/ARGUMENTS

This is responsive to the Office Action dated February 4, 2005.

The Examiner objected to the drawings on the ground that they do not show a separation between the support part 13 and the remaining region of the lever 9 as recited in claim 5 and as supported in the paragraph bridging pages 4 and 5 of the specification. Submitted herewith is a new Figure 3. Corresponding amendments to the specification are being made at pages 2 and 5. Fig. 3 shows schematically a slot 14 separating the support part 13 from the remaining region of the lever 9 as recited in claim 5. The amendments herein are believed to satisfy the Examiner's objection, withdrawal of which is accordingly requested.

The Examiner objected to the phrase "or the like" in line 3 of claim 1. The objectionable phrase has been deleted.

The Examiner's finding of patentable subject matter in claims 3-6 is gratefully acknowledged. Claim 3 has been placed in independent form, claim 1 has been canceled and claim 2 has been amended to depend from claim 3. Accordingly, claims 2-6 are now in condition for allowance.
